

06 Classifai : Open-source and Comprehensive Annotation Tool

Introduction to **Classifai**

Introduction to **Classifai**

More than 80% of AI Solutions implement **supervised learning**.

Step 1

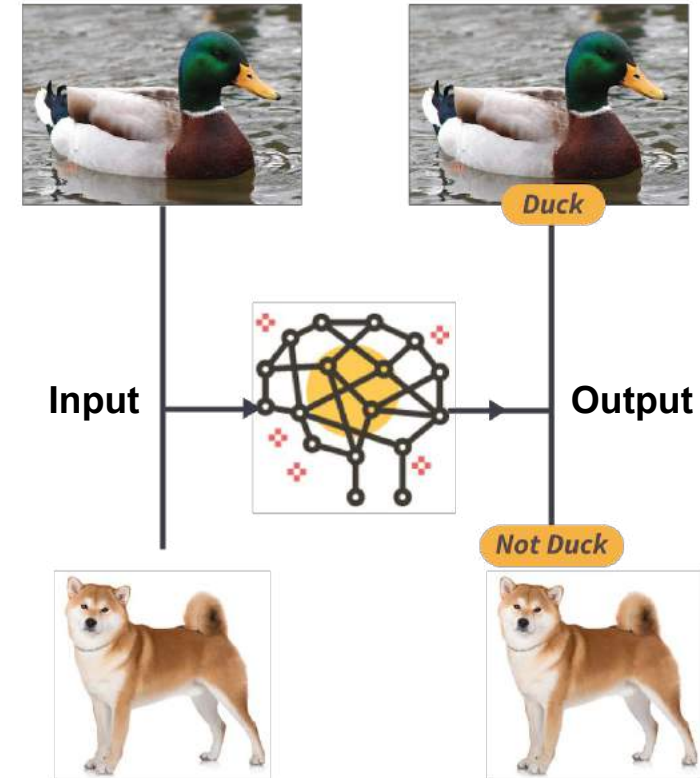

Provide the machine learning algorithm with “labeled” input data to learn.

Images labeled
with “Duck”

Step 2

Feed the algorithm with “unlabeled” data to see if it labels the data correctly.

Introduction to **Classifai**

What is **Classifai**?

Data annotation tool developed by CertifAI to enable seamless and intuitive preparation of data for supervised learning.

Raw Data Sources

Labelled data

AI model
training

Introduction to **ClassifAI**

Get Started with **Classifai**

Step 1

Download and install the distribution

Step 2

Run the Application

Step 3

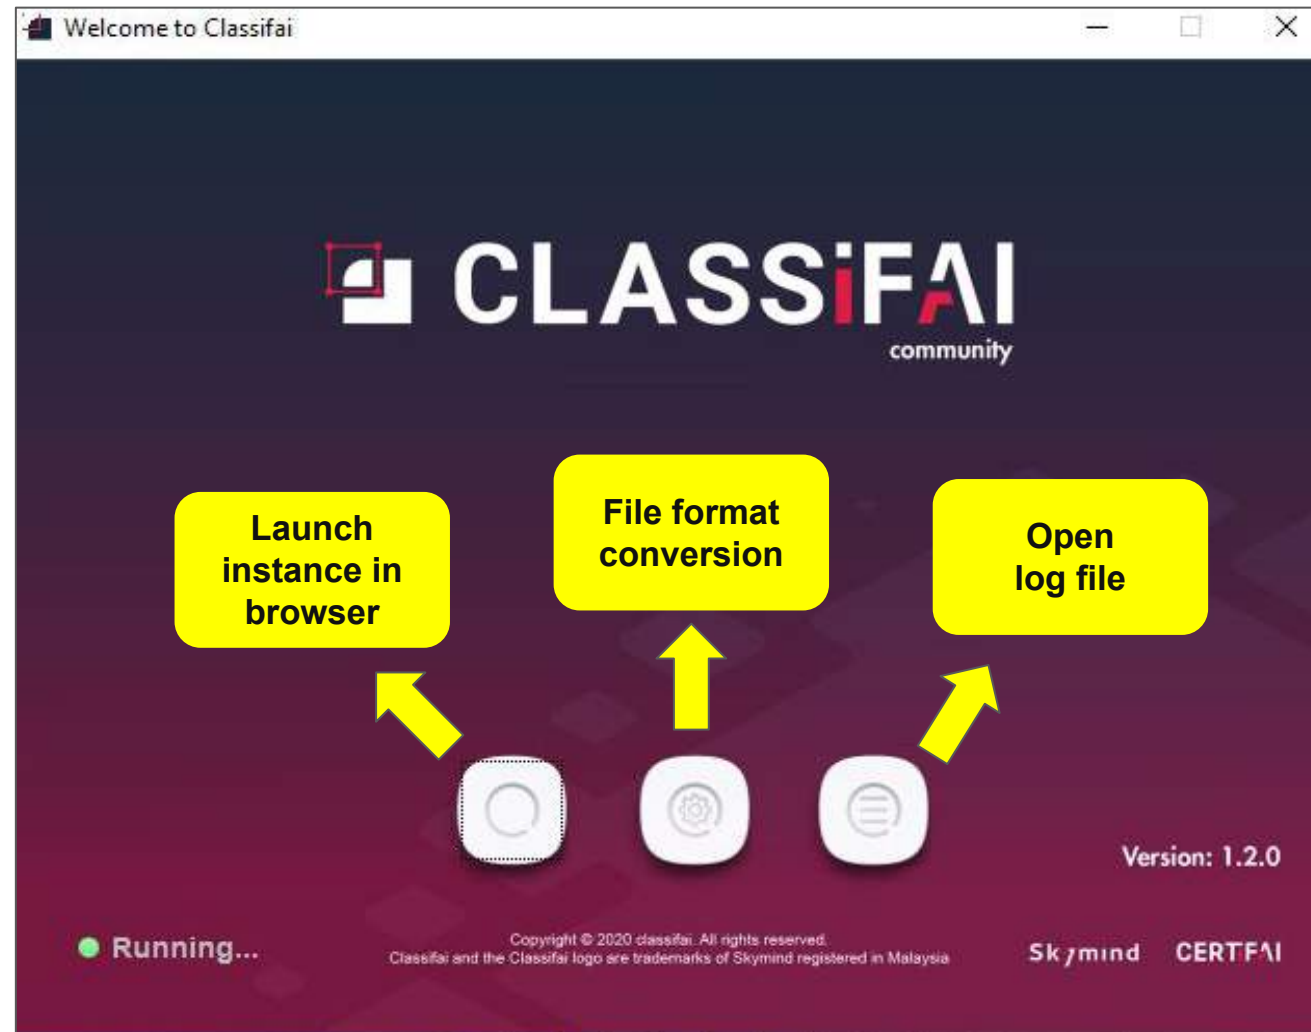

Start an instance in browser

Overview of **Classifai**

Welcome Launcher

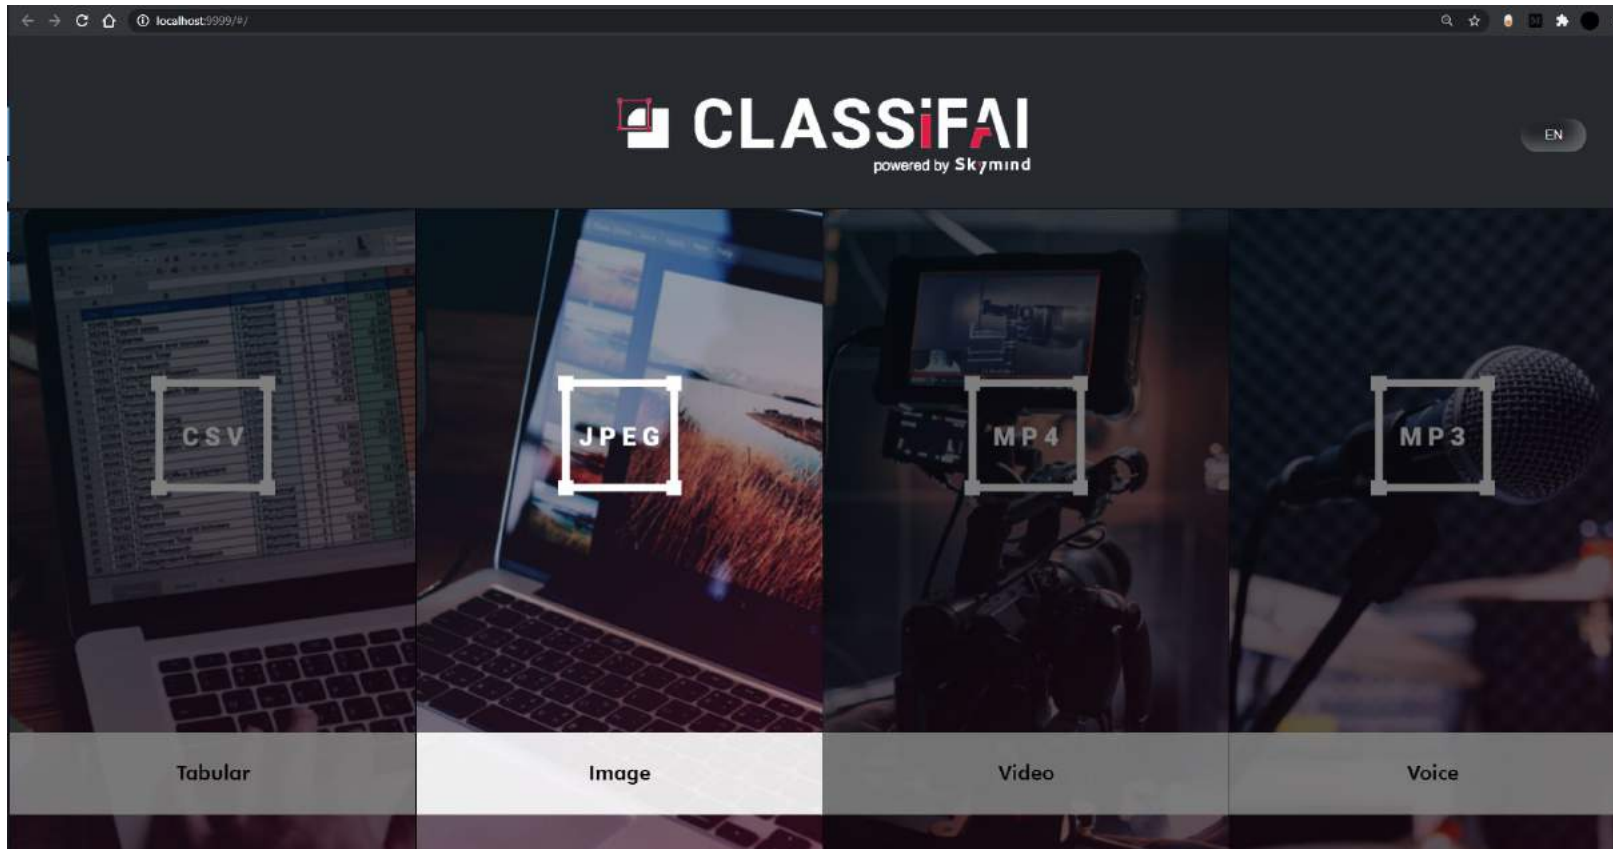

Overview of **Classifai**

Navigation Page

Upon launching the server, you will come to the navigation page. Choose your preferred mode and start labelling!

Classifai's Tool Overview

When hit into errors, support Classifai's developers by:

- Stating how did the error happened (So that developers can reproduce the error).
- Open, save the log file and attach with report.

**Save
log file**

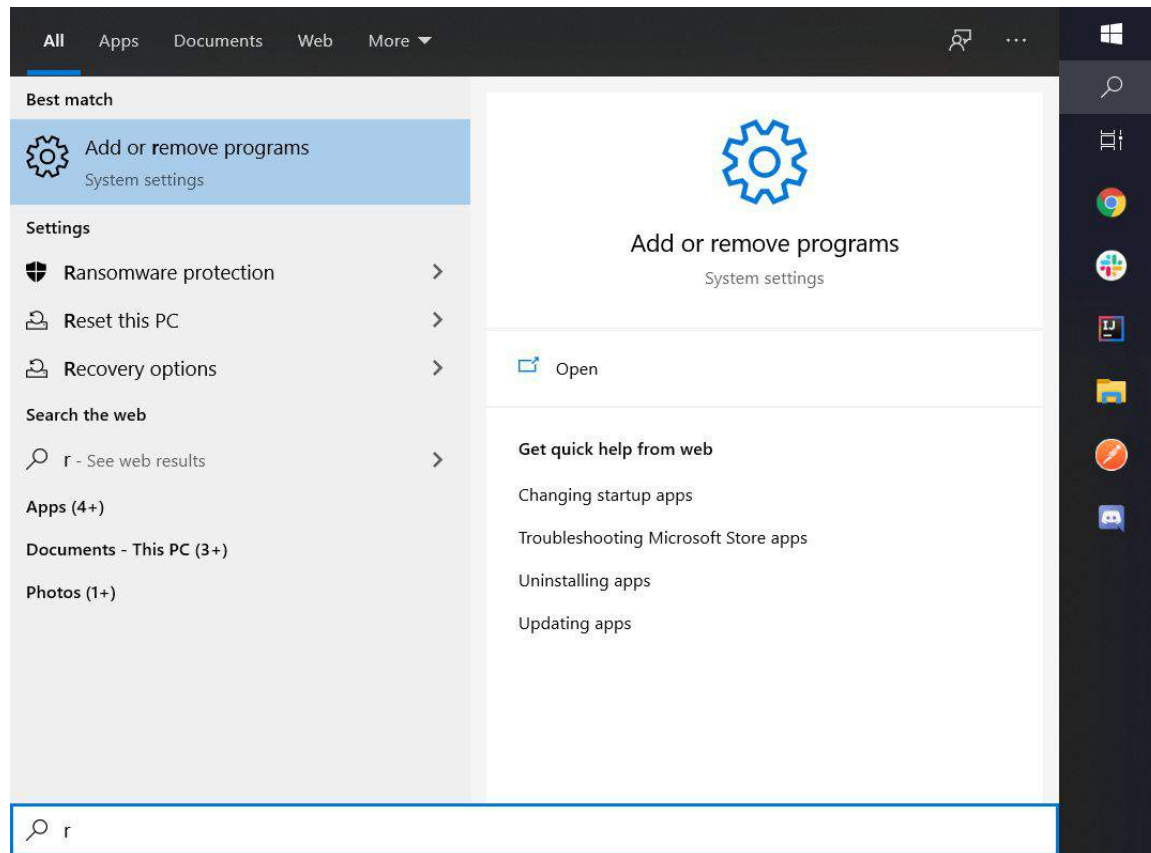

Uninstall Classifai (Windows)

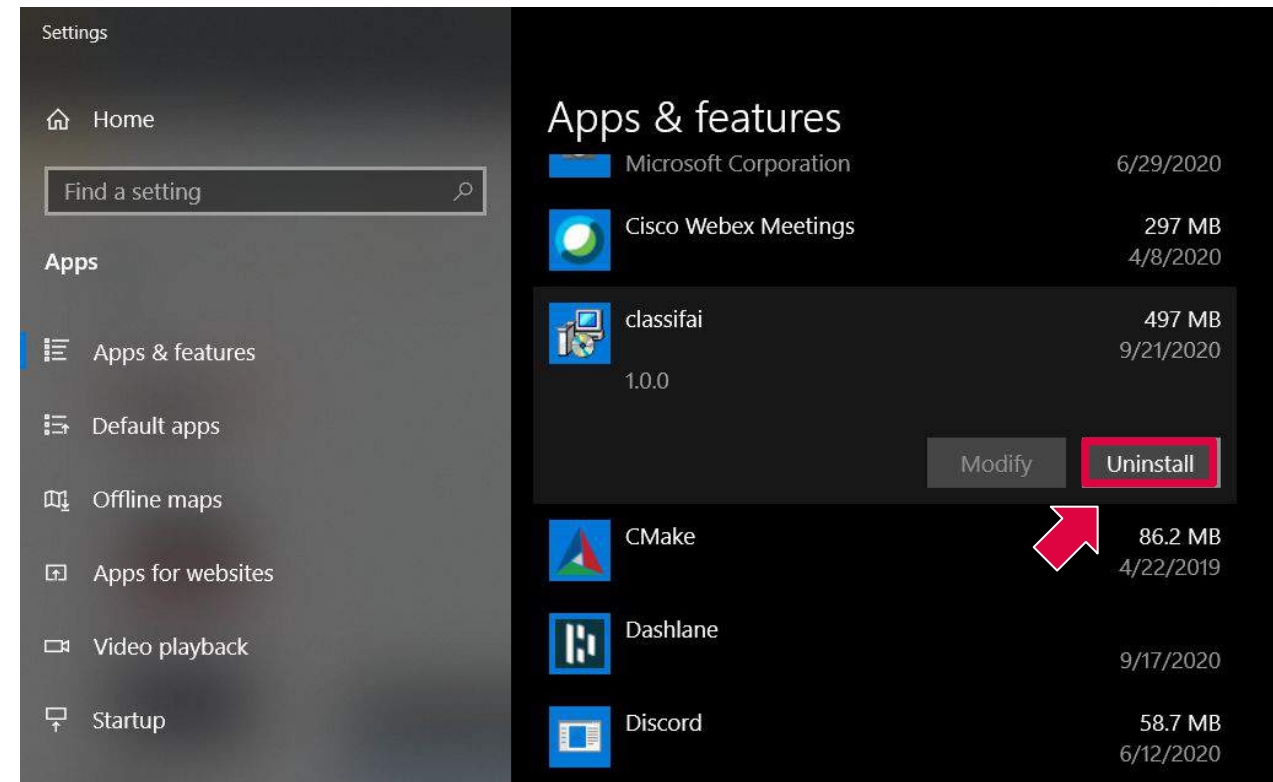

Step 1

Search for “Add or Remove Programs”

Step 2

Uninstall Classifai

Classifai Hands-on
